Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 and 4-7 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent Number 6,480,884 to Saito.

3. As to claim 1, Saito teaches a data communication apparatus comprising: an inputter arranged to input file data (col. 5, lines 38-58); a setter arranged to set a subject of an electronic mail to be transmitted (col. 7, lines 1-12); a producer arranged to produce a file name of the file data input by said inputter based on the subject set by the setter (col. 5, lines 38-58); and a transmitter arranged to transmit electronic mail data including the file data input by said inputter, the subject set by said setter, and file name produced by said producer (col. 5, lines 59-67).

4. As to claim 2, Saito teaches a data communication apparatus according to claim 1, wherein said inputter inputs the file data obtained by reading an image on an original (col. 5, lines 38-58).

5. As to claim 4, Saito teaches a data communication apparatus according to claim 1, wherein said producer produces the file name based on a number of the file data input by said inputter and the subject set by said setter (col. 5, lines 38-58).

Art Unit: 2142

6. As to claim 5, Saito teaches a data communication apparatus according to claim 1, wherein said producer produces the file name in accordance with a kind of the file data input by said inputter (col. 5, lines 38-58).

7. As to claims 6-7, they feature the same limitations as claim 1 and are rejected for the same reason as claim 1.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,480,884 to Saito in view of U.S. Patent Number 6,683,700 to Shiota et al..

10. As to claim 3, Saito teaches the apparatus of claim 1, however Saito does not explicitly teach a detachable memory.

Shiota teaches a data communication apparatus wherein the inputter inputs the file data obtained from a detachable memory (col. 3, lines 54-67).

It would have been obvious to one of ordinary skill in the Computer Networking art at the time of the invention to combine the teachings of Saito regarding emailing images with the teachings of Shiota regarding detachable memories because detachable memories are common to digital cameras that produce images (Shiota, col. 1, lines 29-37).
